

Did you know that it takes between 400 and 1000 years for a toner cartridge to break down in a landfill?

RK Dixon needs your help in making sure less of those cartridges end up in a landfill. Below are four different options you can choose from to help our environment just run better!

Please check your Lanier toner container box - you may already have a prepaid return label enclosed. If so, please follow directions for returning your cartridge.

You may already have your own recycling center in your office or community. Please look for the SPI symbol (recycle arrows) on your toner container and recycle accordingly.

Visit Lanier's toner recycling website:

http://www.lanier.com/about/environment/Toner_Cartridge_Recycling.aspx

If you cannot recycle with your local municipality, we invite you to ship your supplies to Lanier's recycling center. Lanier will include those items in their recycling infrastructure, ensuring safe and environmentally responsible recycling at their expense.

Please send your supplies to:

Lanier Recycling 2051 Meridian Place, Hebron, KY 41048

Please seal your items in a heavy duty plastic bag, inside a cardboard box.

Contact RK Dixon at **877-RK DIXON** to order your Lanier return box.

Purchase a shipping box from us and return the entire box to Lanier, ensuring nothing ends up in a landfill. Prepaid return label included.

*Box dimensions: 26"(h) x 19"(w) x 10"(d). **Cost is \$20/box.***
